

LANL continued to expand its communication efforts by working with local radio station KRSN on a variety of talk shows highlighting Lab-related activities, issues, and human-interest stories. Examples of these shows include NNSA's proposed transformation of the nation's nuclear weapons complex, the Lab's 2007 United Way Campaign, the Expanding your Horizons Program that encourages Northern New Mexico girls to consider a science career, and positive ways of coping with change and transition.

Lab teams with community radio station to promote activities, issues
